

Expense Tracker

Project Report | Gulshan Kumar - Python & Data Science Projects

Objective

Python app to record expenses, classify categories and summarize monthly spending.

Technologies Used

Python, Pandas, NumPy, Matplotlib, OpenPyXL/Excel

Modules

- Data collection and loading
- Data cleaning and validation
- KPI calculation and summary metrics
- Visualization and dashboard creation
- Insights/recommendations
- Documentation and GitHub upload

Architecture / Flow Diagram

Expense Tracker

Sample Output / Dashboard Screenshot

Key Features

- Clean folder structure
- Reusable Python source code
- Excel/CSV dataset
- PDF documentation
- PowerPoint presentation
- README and requirements file
- Resume-ready project summary

Conclusion

This project demonstrates practical skills in Python programming, data handling, visualization, analytics and professional documentation. It is suitable for GitHub portfolio, resume, interviews and learning practice.
